

## Featured OSINT Webtools:

**For the best results, combine multiple username/email tools to cross-check your findings, as each tool may find different results.**

**These are just some of our favorites. There's always more! Be sure to vet your tools as best you can. See what others are saying too!**

Source	Purpose	Notes
<a href="#">ID Crawl</a>	Search by username/email	Avoid paid reverse phone/email searches.
<a href="#">Castrick Clues</a>	Search by username/email	Click website logo to view profiles if found.
<a href="#">User Searcher</a>	Search by name/username	Ignore results requiring account creation.
<a href="#">Digital Footprint Check</a>	Search by username	Click on results to see if a valid profile was found.
<a href="#">WhatsMyNameApp</a>	Search by username	Search multiple usernames at once (one per line)
<a href="#">OSINT Rocks Toolkit</a>	<b>Sherlock:</b> Search by username <b>WhatsApp:</b> Checks if number is on WhatsApp <b>Ghunt:</b> Checks for Google Reviews <b>Holehe:</b> Checks if an email is registered on certain sites	WhatsApp Search: Switch country to U.S. and check if linked to WhatsApp (access profile via mobile search) Holehe: Results will tell you which websites match the email to a username in a profile's URL. <ul style="list-style-type: none"><li>- Example:<ul style="list-style-type: none"><li>o Results show email was registered on Twitter for johnsmith48967@hotmail.com</li><li>o Navigate to Twitter.com/johnsmith48967 to locate possible profile.</li></ul></li></ul>
<a href="#">Bellingcat TikTok tool</a>	Provides timestamp for TikTok posts.	Must enter URL to the exact post.
<a href="#">Intel Techniques</a>	Provides timestamp for LinkedIn posts using the URL to a specific post.	Enter the post's exact URL in the bottom text entry box in the LinkedIn tab and select Timestamp to search.

<a href="#">Instagram Timestamps</a>	Provides Instagram timestamps for posts, comments, and edits,	Download the chrome extension and then open a post in separate tab and hover the mouse over the post date.
<a href="#">Pinterest RSS feed</a>	Provides timestamps for Pinterest posts.	Add “feed.rss” at the end of a Pinterest profile. Example: <a href="https://www.pinterest.com/wineaux/feed.rss">https://www.pinterest.com/wineaux/feed.rss</a>
<a href="#">Gravatar Email Check</a>	Checks to see if an email is linked to a Gravatar account.	Same as Epios/Castrickclues
<a href="#">Skype Email Check</a>	Checks if an email is registered on a Skype profile.	Same as Epios/Castrickclues
<a href="#">Wayback Machine</a>	Way back machine search to find and search archived versions of websites if available.	Example: Enter the VRC website URL in the website’s search bar to view previous versions of the company site.
<a href="#">WebCrawler</a>	Locates additional online mentions potentially not viewable on Google by searching key word/username.	Example: Search subject’s username to locate online mentions referencing the username.
<a href="#">GeoSpy</a>	Uses AI to identify where a photo was possibly taken. (Works best with skyline/unique buildings. Always confirm results via google maps).	The tool only functions with .jpeg files  <b>Tip:</b> You can Google search for a free .jpeg file converter tool if you need to change the file type for a photo)
<a href="https://12ft.io/">https://12ft.io/</a>	Allows you to view a webpage without needing to pay for access.	Especially useful for viewing news articles which require a subscription to view.
<a href="#">WhatsApp Check</a>	Checks if a number is on WhatsApp. Provides image, bio, and other user data.	Uses official WhatsApp API key. Provides an image link for the profile photo and helps for those that have phone issues.
